## Heat Wave Sdr

HEAT WAVE The Grand Challenges for Disaster Reductionoutlines a ten-year strategy crafted by the National Science and Technology Council's Subcommittee on Disaster Reduction (SDR). It sets forth six Grand Challenges that, when addressed, will enhance community resilience to disasters and thus create a more disaster-resilient Nation.

Over on Reddit, user tautology2 has linked to his project which is software that can create a heatmap of signal strengths. His software uses the data that is output from RTLSDR Scanner which is a program that will collect signal strength data over any desired bandwidth and at the same time also record GPS coordinates using an external GPS receiver.

raising the temperature of its heat sinks, while delivering 1 watt to its external load. There is high motivation to reduce the peak to average power levels of the transmitted signal. Reductions in PAPR result in significant reduction in power supply draw and dissipated waste heat required to deliver a specified average power.
